

*You're invited  
to a Special Presentation*

## **THE MORAL STATUS OF AI** *How Are We to Relate to Humanoid Robots*

Social Robots are coming. They are being designed to enter our lives and help in everything from childrearing to elderly care, from household chores to personal therapy, and the list goes on. But there is a dilemma. On the one hand, these machines are just that, machines. On the other hand, we innately relate to entities that behave with autonomy and mobility as living beings.

*How are we to relate to robots that look like us, talk like us, walk like us?*

### **BIO**

Mois Navon is one of the founding engineers of Mobileye, where he designed the EyeQ family of SoC (System On a Chip) - the chip powering the autonomous vehicle revolution. Mois is also an ordained rabbi who has published numerous articles on Jewish law and lore. He is currently pursuing his PhD at the department of Jewish Philosophy at Bar Ilan University where his thesis seeks to apply Jewish philosophy to address the ethical questions arising in the field of artificial intelligence.

**The Robot Future ...  
is here!**
